Background

CR 13596 is a maintenance update of ICD-10 conversions and other coding updates specific to NCDs. These NCD coding changes are the result of newly available codes, coding revisions to NCDs released separately, or coding feedback.

The translations from ICD-9 to ICD-10 aren't consistent one-to-one matches, nor are all ICD-10 codes appearing in a complete General Equivalence Mappings (GEMs) mapping guide or other mapping guides appropriate when reviewed against individual NCD policies.

Relevant NCD coding changes in CR13596 include:

- NCD 90.2 - Next Generation Sequencing (NGS)
- NCD 100.1 Bariatric Surgery for Treatment of Co-Morbid Conditions Related to Morbid Obesity

- NCD 110.18 Aprepitant for Chemotherapy-Induced Emesis

[Previous NCD coding changes](#) are available. Also, see the [NCD spreadsheets](#) for CR 13596.

CMS isn't including any policy changes in this ICD-10 quarterly update. We cover NCD policy changes using the current, longstanding NCD process.

Your MAC will adjust any claims processed in error associated with CR 13596 that you bring to their attention.
