### Background

---

CR 13672 is a maintenance update of ICD-10 conversions and other coding updates specific to NCDs in the lab edit module. The laboratory negotiated rulemaking committee developed the NCDs for clinical diagnostic laboratory services and CMS published the final rule on November 23, 2001. We developed nationally uniform software for the Medicare shared systems so edits apply to laboratory claims subject to 1 of the 23 NCDs. These NCDs are in Sections 190.12 - 190.34 of the NCD Manual, [Chapter 1, Part 3](#), effective April 1, 2003. These NCD coding changes are the result of newly available codes, coding revisions to NCDs released separately, or coding feedback.

The translations from ICD-9 to ICD-10 aren't consistent one-to-one matches, nor are all ICD-10 codes appearing in a complete General Equivalence Mappings (GEMs) mapping guide or other mapping guides appropriate when reviewed against individual NCD policies.

Relevant laboratory NCD coding changes in CR 13672 are:

- NCD 190.12 - Urine Culture, Bacterial
