**SUBJECT: 5010 Implementation—Changes to Present on Admission (POA) Indicator “1” and the K3 Segment**

**I. SUMMARY OF CHANGES:** Effective with the implementation of 5010, Inpatient Prospective Payment System (IPPS) hospitals shall no longer report the POA indicator of 1. ICD-9-CM diagnosis codes that are exempt from reporting POA, shall be left blank instead of populating a 1.

In addition, the K3 segment which was required for reporting POA in the 4010A1 version of the 837I shall no longer be used to report POA. The POA indicators will instead follow the diagnosis code in the appropriate 2300 HI segment.

**SUBJECT: 5010 Implementation—Changes to Present on Admission (POA) Indicator “1” and the K3 Segment**

**Effective Date:** January 1, 2011

**Implementation Date:** January 3, 2011

## I. GENERAL INFORMATION

**A. Background:** On February 8, 2006, the President signed the Deficit Reduction Act (DRA) of 2005. Section 5001(c) of DRA requires the Secretary to identify conditions that are: (a) high cost or high volume or both, (b) result in the assignment of a case to a Diagnosis Related Group (DRG) that has a higher payment when present as a secondary diagnosis, and (c) could reasonably have been prevented through the application of evidence-based guidelines. Section 5001(c) provides that CMS can revise the list of conditions from time to time, as long as it contains at least two conditions.

For discharges occurring on or after October 1, 2008, hospitals will not receive additional payment for cases in which one of the selected conditions was not present on admission. That is, the case would be paid as though the secondary diagnosis were not present.

CMS also required hospitals to report present on admission information for both primary and secondary diagnoses when submitting claims for discharges on or after October 1, 2007.

### CMS POA Indicator Options and Definitions

<i>Code</i>	<i>Reason for Code</i>
<b>Y</b>	Diagnosis was present at time of inpatient admission. CMS will pay the CC/MCC DRG for those selected HACs that are coded as "Y" for the POA Indicator.
<b>N</b>	Diagnosis was not present at time of inpatient admission. CMS will <b>not</b> pay the CC/MCC DRG for those selected HACs that are coded as "N" for the POA Indicator.
<b>U</b>	Documentation insufficient to determine if the condition was present at the time of inpatient admission. CMS will <b>not</b> pay the CC/MCC DRG for those selected HACs that are coded as "U" for the POA Indicator.
<b>W</b>	Clinically undetermined. Provider unable to clinically determine whether the condition was present at the time of inpatient admission. CMS will pay the CC/MCC DRG for those selected HACs that are coded as "W" for the POA Indicator.
<b>1</b>	Unreported/Not used. Exempt from POA reporting. This code is equivalent to a blank on the UB-04, however; it was determined that blanks are undesirable when submitting this data via the version 4010A1. CMS will not pay the CC/MCC DRG for those selected HACs that are coded as "1" for the POA Indicator. The "1" POA Indicator should not be applied to any codes on the HAC list.

The Administrative Simplification provisions of HIPAA require the Secretary of HHS to adopt standard electronic transactions and code sets for administrative health care transactions. The Secretary may also modify

these standards periodically. The purpose of this change request is to direct the Medicare Part A translators and systems to make the necessary system changes related to the new POA requirements for the next version of HIPAA.

**B. Policy:** Effective with the implementation of 5010, Inpatient Prospective Payment System (IPPS) hospitals shall no longer report the POA indicator of “1”. ICD-9-CM diagnosis codes that are exempt from the POA reporting requirement shall not report a POA indicator. For calendar year 2011, the CMS will not allow a POA indicator of “1” to be submitted via direct data entry (DDE) claims.

In addition, the K3 segment which was required for reporting POA in the 4010A1 version of the 837i shall no longer be used to report POA in the 5010 version. The POA indicators will instead follow the diagnosis code in the appropriate 5010 version 837i 2300 HI segment.
