All other information remains the same.

PROVIDER TYPE AFFECTED

This MLN Matters® Special Edition Article is intended for Durable Medical Equipment (DME) suppliers who submit claims to DME Medicare Administrative Contractors (DME MACs) for items provided to Medicare beneficiaries.

WHAT YOU NEED TO KNOW

The Centers for Medicare & Medicaid Services (CMS) is publishing this Special Edition article to inform suppliers of the Serial Claims initiative, in which CMS is implementing changes to improve the processing and adjudication of Medicare Fee-For-Service (FFS) recurring (or serial) claims for capped rental items and certain Inexpensive and Routinely Purchased (IRP) items. This initiative began in April 2017.

BACKGROUND

Prior to April 2017, when one claim in a series (that is, a serial claim) was denied and then appealed independent of the other claims in the series, generally the appeal was adjudicated independently and without reference to other claims in the series. As a result, claims within a series could be denied and pending at different levels of appeal simultaneously.

As a process improvement effort, CMS recently directed the DME MACs to change the process by which they adjudicate appeals of serial claims. Once the reason for denial for one claim in a series is resolved at any appeal level, the DME MACs will identify other claims in the same

series that were denied for the same or similar reasons, and take that determination into consideration when adjudicating such claims. Specifically, the DME MACs will apply this process to:

- Claims pending redeterminations; and,
- Claims in the series for which a redetermination was issued, but the timeframe to request a reconsideration by the Qualified Independent Contractor (QIC) has not yet elapsed.

The DME MACs will also communicate the favorable decision(s) to the DME QIC and the Office of Medicare Hearings and Appeals (OMHA) to consider when adjudicating related appeals pending at those levels.

CMS has also instructed the DME MACs to update the Certificate of Medical Necessity (CMN) in the ViPS Medicare System (VMS), when appropriate, to reflect when a favorable decision has been rendered for a serial claim, allowing future claims in the same series to pay without requiring suppliers to continually resubmit evidence. As a result of these changes, the Serial Claims initiative will prevent future claims that are part of a previously adjudicated series from unnecessarily entering the appeals process, since the denial reason has been resolved for a related claim in the series. This change will also ensure that items that have been subject to medical review and have been determined to meet medical necessity standards, will continue to be paid consistently for the duration of the rental period, in instances where the medical necessity decision is applicable to other claims in the series.

Finally, CMS instructed the DME MACs to perform data analysis of all favorable serial claim appeal decisions made over the past 3 years, in an effort to capture all currently pending appeals in the series that could be included in this initiative. Suppliers do not need to take any action and should not reach out to the DME MAC within their jurisdiction to request that their appeal be considered for this initiative.

Please note that the data analysis of this initiative only applies to recurring (or serial) claims for capped rental items and certain IRP items adjudicated during the 3-year timeframe. The HCPCS codes that are included in the Serial Claims initiative are attached to this article. This list is subject to change and inclusion of a claim in this initiative is at the discretion of CMS.
