

Effective January 1, 2023, the Inflation Reduction Act (IRA) eliminated enrollee cost-sharing for recommended vaccines covered under Medicare Part D. In 2021, 3.4 million people received vaccines under Part D, and annual out-of-pocket costs were \$234 million. This translates to nearly \$70 in out-of-pocket spending per Medicare enrollee receiving a Part D vaccine that they would not have had to pay if the IRA had been in effect in 2021.

3.4 Million Medicare Part D enrollees spent **\$234 million** on out-of-pocket cost for vaccines in 2021

Under Inflation Reduction Act Medicare Part D enrollees pay **\$0** in **2023** for these vaccines
