

Baby on Board? Get Vaccinated for Flu, COVID-19, and RSV

During pregnancy, you and your baby deserve the best protection from severe flu, COVID-19, and RSV.

- ➔ **Getting vaccinated for flu and COVID-19 during pregnancy:**
 - **Helps protect you** from serious illness and hospitalization
 - **Lowers your risk** of poor pregnancy outcomes, like preterm birth and stillbirth
 - **Helps protect your baby** when they're too young to get vaccinated
- ➔ **Getting an RSV vaccine during your pregnancy helps protect your baby from severe RSV.**
- ➔ RSV is another common respiratory virus, and it can be dangerous for babies younger than 6 months. It's the **number one reason** babies in the United States are hospitalized.

**But you can get an RSV vaccine to help protect your baby.
Talk to your doctor about when you should get vaccinated
during your pregnancy.**
